

Rosina Scampino

Minneapolis, MN | 617-818-4683 | rosinascampino@gmail.com | www.rosinascampino.com

Professional Summary

Self-taught software developer and versatile technologist with hands-on experience integrating and troubleshooting REST APIs, debugging JSON payloads, and tracing issues to root cause across front-end and backend systems. Brings a unique background in education, small business ownership, and restaurant hospitality, offering an exceptional ability to translate complex technical concepts for non-technical stakeholders. Highly skilled at the "detective work" of investigating bugs, reading payloads, and identifying root causes — developed independently, through real shipped projects.

Technical Skills

- **APIs & Data:** REST APIs, JSON, XML (working knowledge), GraphQL (familiar, quick to extend), API troubleshooting, root cause analysis
- **Web Technologies:** JavaScript, Python, HTML, CSS, React, Astro, Progressive Web Apps (PWA)
- **Tools & Platforms:** Postman, Firebase (Auth, Firestore), Git/GitHub, Netlify
- **Core Competencies:** Technical translation for non-technical audiences, cross-functional communication, training, documentation research, self-directed learning

Professional Experience

Software Developer | November 2022 – Present

Stickings Builder — stickingsbuilder.app (*sole developer*)

- Conceptualized, developed, and deployed a unique music education web application from the ground up, using React.js/TypeScript with continuous deployment via Netlify.
- Integrated third-party JavaScript libraries — VexFlow.js for music notation rendering and Tone.js for audio playback.
- Set up user authentication with Firebase Auth/FirebaseUI (email-based and OAuth methods) and a real-time Firestore database for data management and retrieval.
- Added Progressive Web App (PWA) functionality for installability and offline use.
- Followed structured version control practices with Git and GitHub across iterative development cycles, maintaining a structured ticketing log in Notion to track, prioritize, and resolve bugs and feature requests.

- Documented development progress with diagrams and journals for transparency and future reference.

Additional Projects

- **Weather forecast app** — Used Postman to explore and test the National Weather Service (weather.gov) REST API before writing code against it, then built a small web app parsing and displaying live JSON forecast data for current conditions.
- **Names dataset project** — Wrote Python scripts to scrape popular-name data from multiple countries' census websites, then cleaned and normalized the results — resolving inconsistencies across disparate source structures — and output a consolidated CSV file.
- **Word synonyms game** — Wrote a Python script to clean a raw thesaurus dataset into a usable JSON database, then built a browser game in vanilla JavaScript that queries it to generate and validate synonym matches in real time.
- **Drum lessons business website** — Designed and built a client-facing website for my independent music teaching business using Astro, Netlify, and Antigravity.

Music Educator and Professional Drummer | March 2007 – Present

- Established and expanded a successful private lessons studio, mentoring students weekly for 10+ years.
- Performed a masterclass at Berklee College of Music to an audience of 200 attendees.
- Appointed Assistant Professor at the National University of Rosario (Argentina), teaching drum set performance and music theory for two years.

Staff Trainer and Server | Barcelona Wine Bar | Boston, MA | August 2016 – April 2022

- Delivered experiential, guest-focused service in a fast-paced, high-volume environment, resolving order issues and special requests in real time while maintaining consistency under pressure.
- Trained new managers and waitstaff on service standards and Spanish cuisine and beverages, ensuring a consistent guest experience across multiple restaurant locations.

Education

Berklee College of Music | Boston, MA

- Master of Music in Contemporary Jazz (Full Scholarship)
- Bachelor of Music in Music Performance (Performance and Composition Scholarship)
